

The CITYkeys project - one lesson learnt

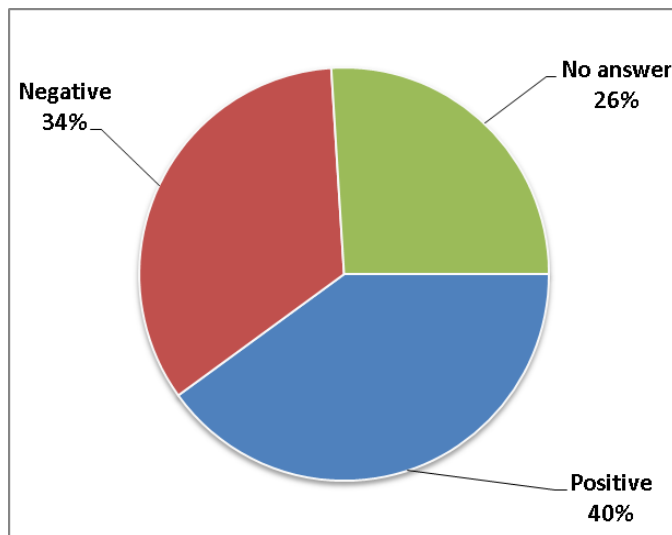

Nikolaos Kontinakis, EUROCITIES
Connected smart cities conference,
Brussels, 12/01/2017

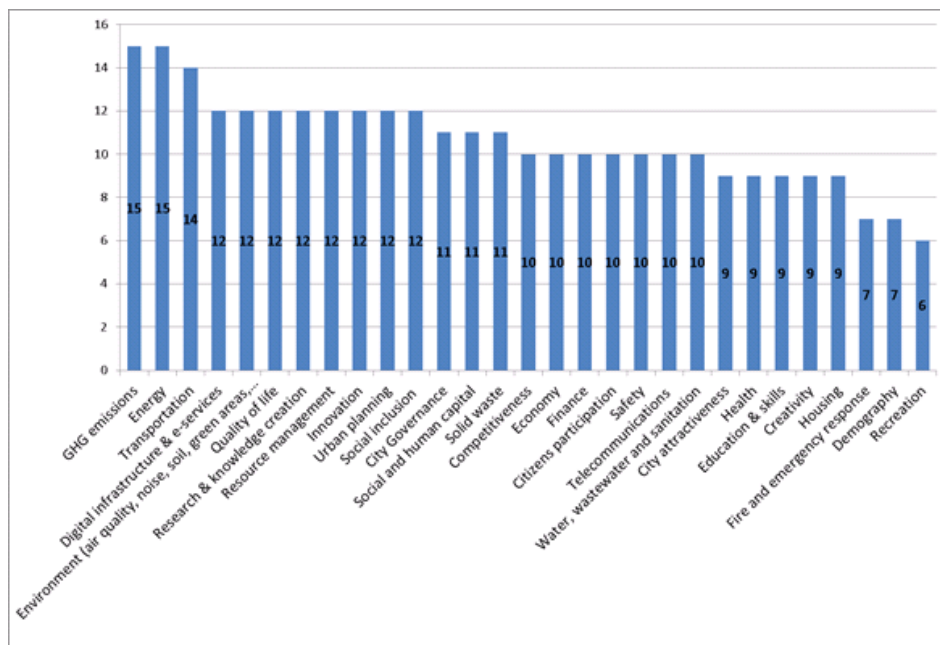

Asking the cities: How high is the topic of ‘smart city’ in your city’s agenda?

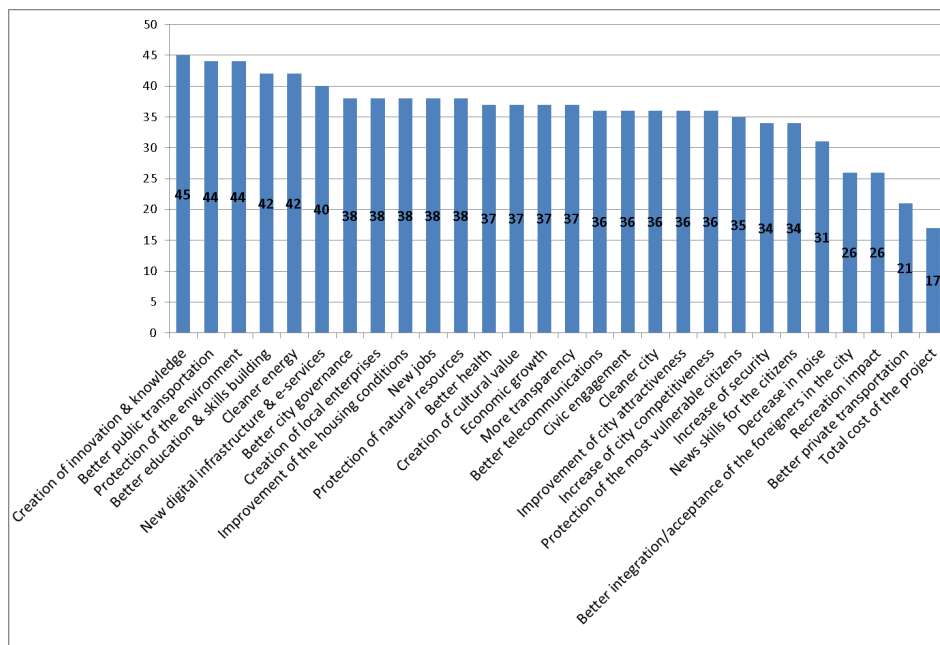

Asking the citizens: Do you think your city is 'smart'?

Smart city project level: *Areas where cities mostly need indicators to measure their smart city projects' performance*

Citizens & stakeholders: Most important (desired) project results

Important questions about the objectives of standardisation

- Whose interests does it serve?
- Are all voices and considerations heard?
- ...and taken into account?
- What are the priorities and trade-offs?

Thank you!
