IoT – Perspectives from the City of Aarhus
Introducing school children to Smart City possibilities

Introducing school classes to Smart Cities
Giving children and citizens a view and understand of new technology
Involving relevant staff and citizens
Green light to cyclists

Aarhus EU-projektet RADICAL udvikler en cykelservice, hvor RFID-tags på cyklerne aflæses og sender signal til lyskrydset om at skifte til grønt.

Doing projects like OrganiCity and RADICAL
LP WAN
In the City of Aarhus
Involving business developers from the city, external business developers and citizens.
Aarhus City Lab
Technology (WiFi, LP WAN, sensors...)
The Democracy screen
Installations and activities
Test facility for Smart solutions, citizens’ involvement etc.
