✓ Testing Services in Real Life Experiences
So Mobility, making urban travels easier

- Public-private bodies acting together
- To anticipate yards impact on traffic
- To test innovative solutions

**Consortium**

- Public
- Companies
- Start-ups
- R&D
Mobility Pilots

1st French City where you can pay your parking with mobile phone

Bus in real time on the map of your smartphone

Pilot to find a parking spot in a predictive way

Pilot for park sharing in a school parking
Mobility Pilots

- Test of a driverless shuttle in a public park
- Sensors for real time availability of on street parking spots
- On-street and off-street parking spots available published on data.issy.com
- Promotion of carpooling 2.0
Polivisu, big data for policymaking

The target of the project is the creation of tools and visualisations in real time and with predictive analysis to help policymaking.

- A board to mash up data
- Prediction of traffic with calculation of the impact of roadworks
- Analysis of social network data to extract traffic data
Thank you for your attention
