# Towards a European Data Sharing Space

## Enabling Data Exchange and Unlocking AI potential

"What is the current state of the **European Data Economy**, and what must be done to make it flourish and competitive on a global scale?"

- What distinguishes data platforms and data spaces?
- European Data Space: What value would this bring to you?
- Data Ownership: is there such a thing, legally AND technically?
- Data Markets: To what extent should the EU intervene to guide their set-up?
- How can data platforms become easily interoperable and what value would this bring to you?
