WORLD DATA LEAGUE

About WDL

We seek to **accelerate** the creation of

accessible data-driven solutions for **social impact**.

OUR PROCESS

DATA COMPETITION

Open source output

- **Insights Report:** Feasibility of solving a challenge with data, main insights and feedback on data that is provided
- **Executive summary:** Executive summaries of all the submission, including intended usage of the AI model and the impact measurement.
- **Open Source Code:** All the code of the solutions is open under the MIT Licence

All of the output is open-sourced and free for anyone to use.

Participant Statistics

From 316 applications and 44 nationalities, we chose:

Number of Nationalities

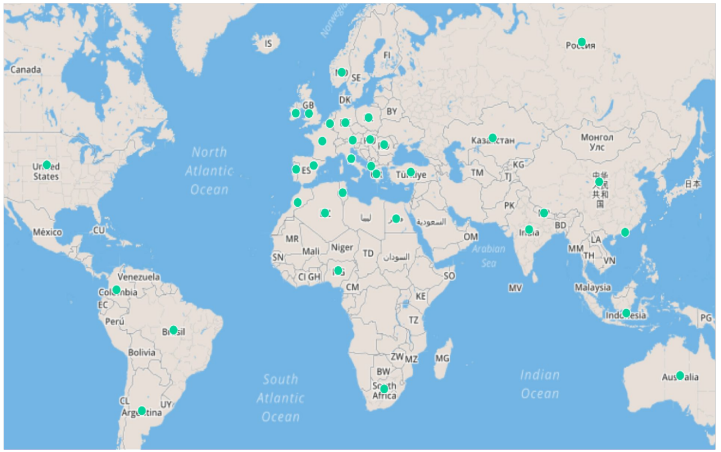
34

Number of Data Scientists

186

Teams

50



Challenge and Data Providers

Challenge Examples

STAGE 1
Public Transportation:

- Churn model for public transportation
- Model of integrated transports for senior citizens

STAGE 2
Traffic:

- Identification of patterns, explanatory factors, and prediction of irregular parking
- Identifying road segments with potential safety hazards

STAGE 3
Cycling:

- (Literally) paving the way towards safer cities
- Missing Links - Closing the circuit in existing cycle networks

PROMISING PROJECT
PROMISING PROJECT

WDL and Living in EU

Our Approach

- **We work directly with cities** but on global challenges.
- **We create an open innovation ecosystem** for data
- **Data-driven technology** is at the heart of WDL
- **Fairness and explainability** is evaluated in the models

You want in?

Call for Challenges is out!

Process

- Submit an initial idea for challenge + possible datasets.
- Improvement of the challenge with concrete intended goals and output.
- Prepare the datasets for the challenge.
- Be available to answer challenge / data related questions during the competition.

We help with all of the steps.

Apply by 15th January
