It's not all bad news!

**Procurement can be an
engine for innovation,
inclusion & better
government services**

A great wave of change in procurement & data

- Paper ⇒ data
- Documentation ⇒ digital workflow
- Compliance & risk ⇒ goal-driven & innovation
- Focus on legislation & reporting ⇒ market competition & performance
- Top-down ⇒ bottom-up
- 'You come to me' ⇒ 'I go to you'.
- 'How is it for me?' ⇒ 'how was it for you?'
- Embedding feedback & accountability

Problem for cities:

- No single picture of procurement
- Disparate & unconnected datasets
- Lack of organisational identifiers
- Transparency & business flow don't connect = double entry & seems extractive = poor data quality
- Lots of paper, some data, little insight
