

Local Digital Twins Procurement Helpdesk to advance smart communities

MIMplus compliance and certification scheme

OASC Conference 2024 – Pitching session

Inês Ramos (Deloitte), Alain Ribault (Kereval)

Advancing initial stages for the transformation of Smart Communities

Scaling the deployment of the enabling digital infrastructure

What we will do in the next 1,5 years

Online Procurement Helpdesk Facility

- Supporting services to deploy at scale local digital platforms (and later digital twins)
- Assess technical maturity of IT infrastructure, and propose digitalization roadmaps

MIM-compliant procurement templates

- Procurement material for local digital infrastructure and local digital twins
- MIM-compliant technical specifications

MIMs Plus compliance and certification

- Standards, procedures and tests that ensure interoperable data spaces and platforms
- Engage the community through sandboxing and interoperability testing event

MIMs Plus compliance and certification network

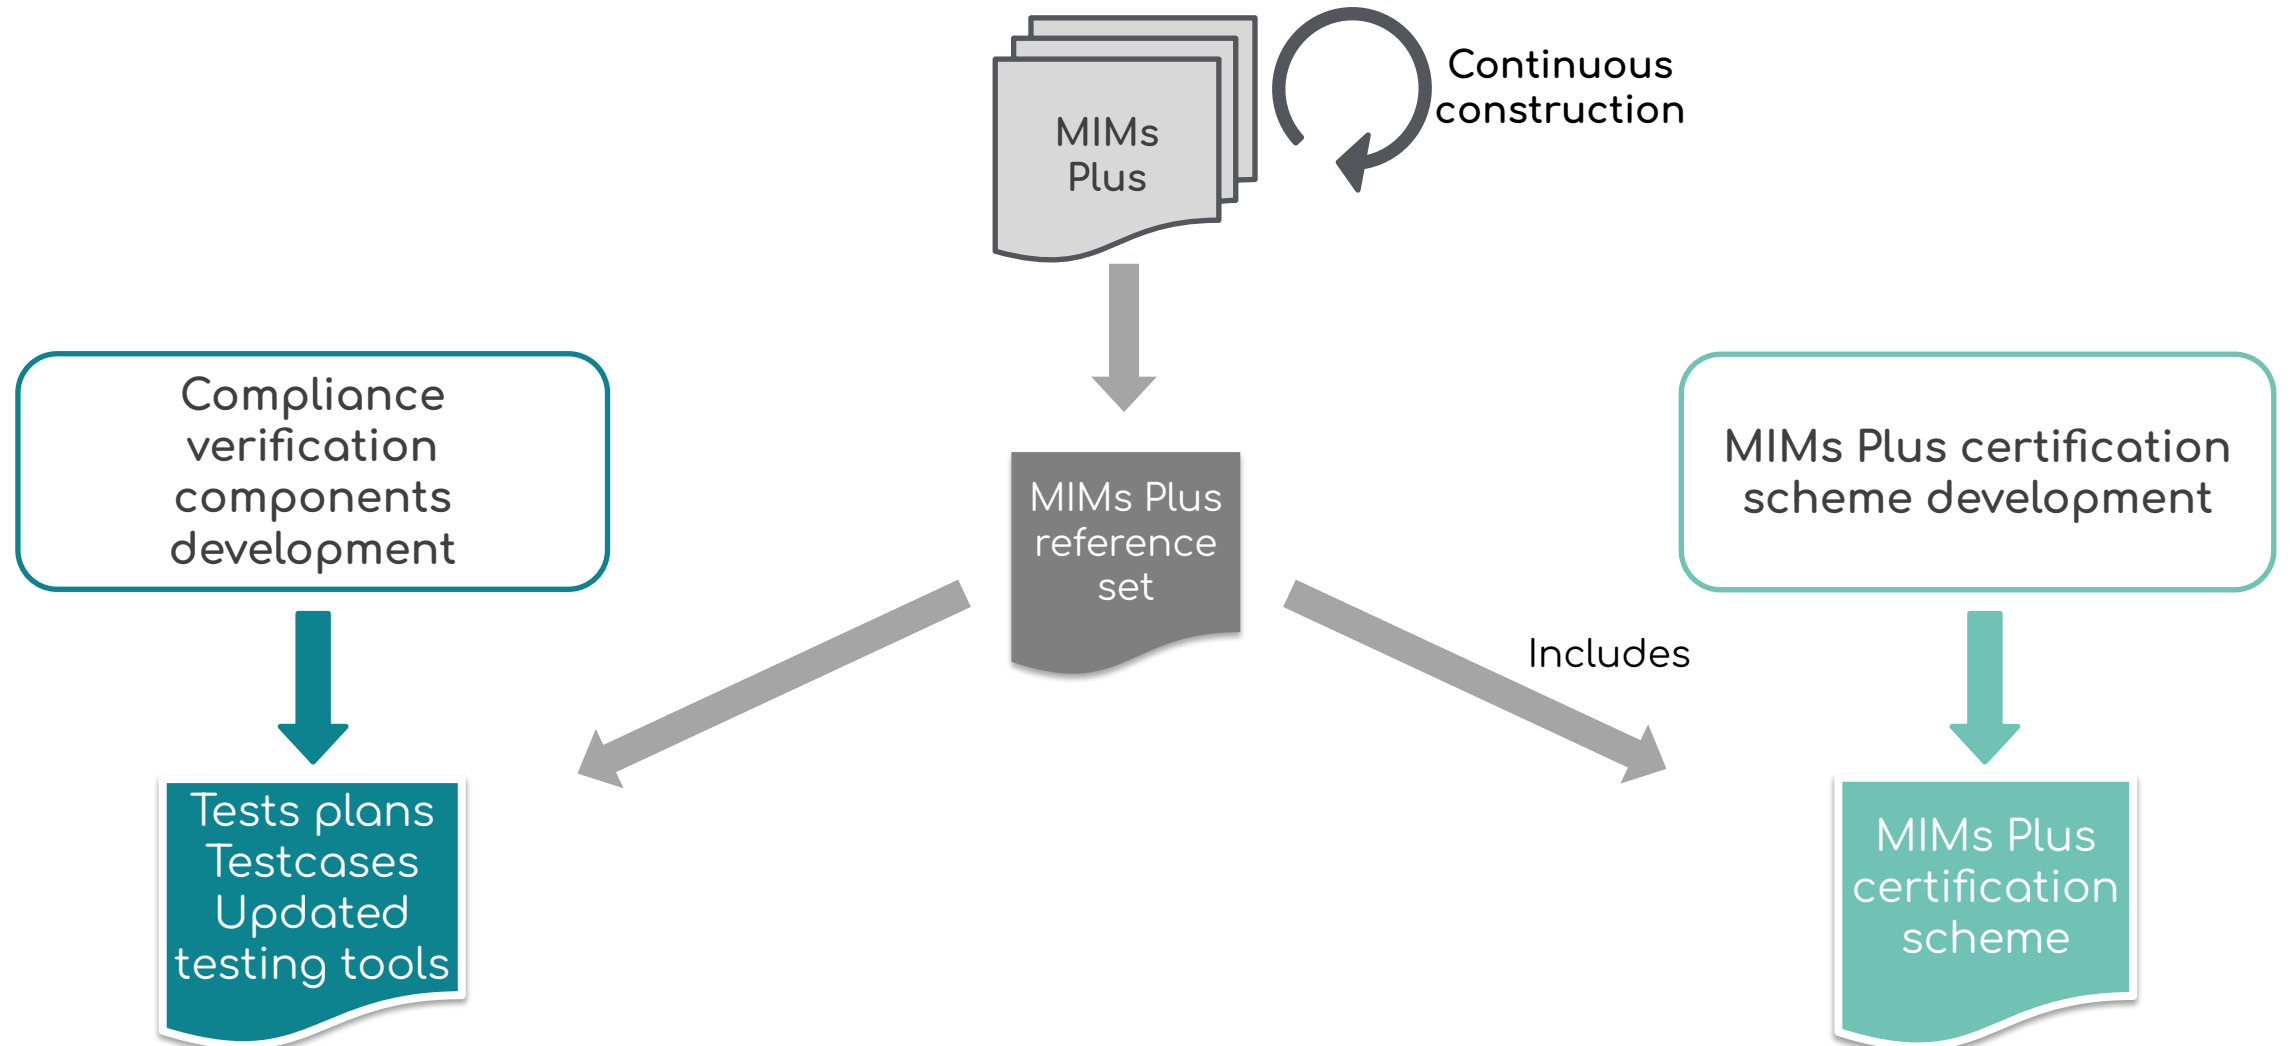

- Proposals for Sustainable conformance and certification schemes as part of the LDT toolbox

How MIMs Plus can support YOU to ensure interoperability of data coming from different agencies/sources

MIMs Plus compliance and certification scheme | What it is about

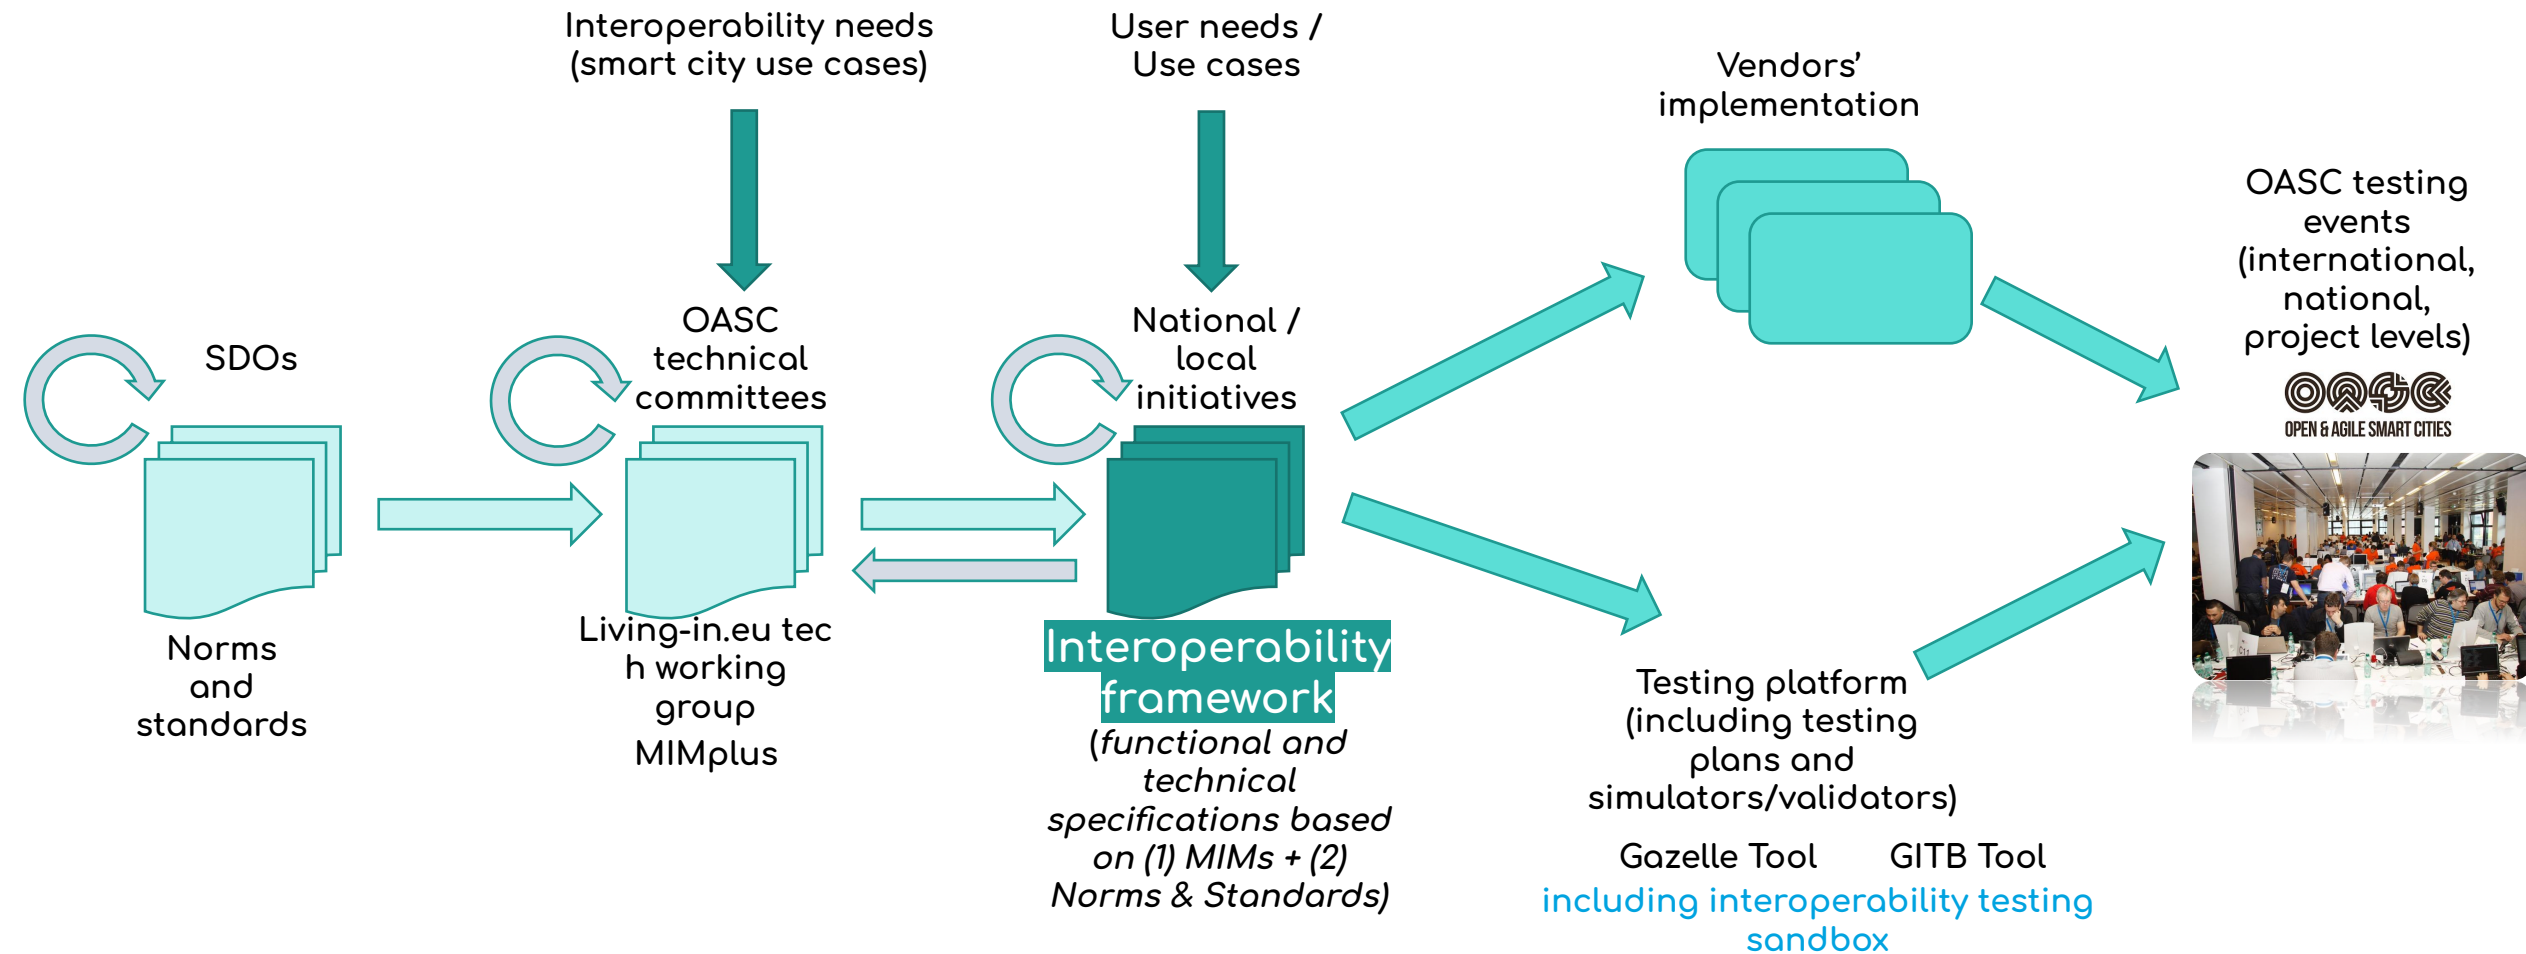

The approach will combine technical know-how needed for conformance testing and certification schemes, as well as active engagement with the community for testing and validation

including interoperability testing
sandbox

Testing interoperability based on OASC / MIMs Plus

Preliminary views to develop the approach for testing interoperability

WE WANT TO HEAR FROM YOU | Help us shape MIMs Plus compliance

We need your feedback - Cities and Vendors

Any **Experience** trying to ensure interoperability between data from different sources?

Have you set up a **data sharing platform**?

What are your **pain points** regarding data sharing?

What are your **expectations** regarding a **MIMs Plus testing sandbox**?

Interested in joining us in a **Workshop** in Q1 2024?

Help us shape the development & deployment of MIMs Plus testing materials, a testing sandbox and a certification scheme based on your needs and experience!
